Intercounty Electric Cooperative Association (IECA)
is accepting bids for

Office Cleaning at their Mountain Grove MO location

The address is 100 West Fifth Street Mountain Grove, MO 65711.
Interested bidders must be licensed, insured and bonded with an LLC.
and carry a minimum \$1,000,000 of liability insurance. This position will
report to the Safety and Loss Prevention Manager.

The primary job duties performed but are not limited to include
emptying trash and replacing all liners, vacuum, sweep, and mop all
floor coverings, clean counters, office furniture, windows and glass
doors. Clean the kitchen, wash dishes, microwave and wash down other
appliances. Clean and sanitize bathrooms, replenish hand soap, paper
towels, toilet tissue etc. Clean and sanitize water fountains. Launder
towels and dishcloths.

Prior office cleaning experience preferred.

This position will be either a Monday/Wednesday or Tuesday/Thursday
position after 5:00pm. Total office space is approximately 1,500
square feet.

Please submit all bids to Intercounty Electric P.O. Box 209
Licking, Missouri 65542. Attention: Director of Human Resources. All bids
must be received no later than 5:00pm May 30, 2025

IECA is an Equal Opportunity/Affirmative Action employer. All qualified
applicants will receive consideration for employment without regard to
sex, race, color, religion, national origin, age, marital status, political
affiliation, sexual orientation, gender identity, genetic information,
disability or protected veteran status. We are committed to providing a
workplace free of any discrimination or harassment.

MANSFIELD PWS

Public Water System ID Number: MO5010493
2024 Annual Water Quality Report
(Consumer Confidence Report)

This report is intended to provide you with important information about your drinking water and the efforts made to provide safe drinking water.

Attention!

Este informe contiene información muy importante. Tradúscalo o pregúntele a alguien que lo entienda bien. [Translated: This report contains very important information. Translate or ask someone who understands this very well.]

What is the source of my water?

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and groundwater wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Our water comes from the following source(s):

Source Name	Type
WELL # 3, 4	Ground Water

Source Water Assessment

The Department of Natural Resources conducted a source water assessment to determine the susceptibility of our water source to potential contaminants. This process involved the establishment of source water area delineations for each well or surface water intake and then a contaminant inventory was performed within those delineated areas to assess potential threats to each source. Assessment maps and summary information sheets are available on the internet at <https://drinkingwater.missouri.edu>. The Missouri Source Water Protection and Assessment maps and information sheets provide a foundation upon which a more comprehensive source water protection plan can be developed.

Why are there contaminants in my water?

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline (800-426-4791).

Contaminants that may be present in source water include:
A. Microbial contaminants, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
B. Inorganic contaminants, such as salts and metals, which can be naturally-occurring or result from urban stormwater runoff, industrial, or domestic wastewater discharges, oil and gas production, mining, or farming.
C. Pesticides and herbicides, which may come from a variety of sources such as agriculture, urban stormwater runoff, and residential use.
D. Organic chemical contaminants, including synthetic and volatile organic chemicals, which are byproducts of industrial processes and petroleum production, and can also come from gas stations, urban stormwater runoff, and septic systems.
E. Radioactive contaminants, which can be naturally-occurring or be the result of oil and gas production and mining activities.

In order to ensure that tap water is safe to drink, the Department of Natural Resources prescribes regulations which limit the amount of certain contaminants in water provided by public water systems. Department of Health regulations establish limits for contaminants in bottled water which must provide the same protection for public health.

Is our water system meeting other rules that govern our operations?

The Missouri Department of Natural Resources regulates our water system and requires us to test our water on a regular basis to ensure its safety. Our system has been assigned the identification number MO5010493 for the purposes of tracking our test results. Last year, we tested for a variety of contaminants. The detectable results of these tests are on the following pages of this report. Any violations of state requirements or standards will be further explained later in this report.

Contaminants Report

MANSFIELD PWS will provide a printed hard copy of the OCR upon request. To request a copy of this report to be mailed, please call us at [417-924-8584](tel:417-924-8584). The OCR can also be found on the internet at www.dnr.mo.gov/cpr/MO5010493.pdf.

The state has reduced monitoring requirements for certain contaminants to less often than once per year because the concentrations of these contaminants are not expected to vary significantly from year to year. Records with a sample year more than one year old are still considered representative. No data older than 5 years need be included. If more than one sample is collected during the monitoring period, the Range of Sample Results will show the lowest and highest tested results. The Highest Test Result, Highest LRAA, or Highest Value must be below the maximum contaminant level (MCL) or the contaminant has exceeded the level of health based standards and a violation is issued to the water system.

Regulated Contaminants

Regulated Contaminants	Collection Date	Highest Test Result	Range of Sampled Result(s) (low – high)	Unit	MCL	MCLG	Typical Source
BARIIUM	7/17/2024	0.00527	0.00527	ppm	2	2	Discharge of drilling wastes; Discharge from metal refineries; Erosion of natural deposits
NITRATE- NITRITE	7/17/2024	0.242	0.242	ppm	10	10	Runoff from fertilizer use; Leaching from septic tanks, sewage; Erosion of natural deposits

Disinfection Byproducts	Sample Point	Monitoring Period	Highest LRAA	Range of Sampled Result(s) (low – high)	Unit	MCL	MCLG	Typical Source
THHM	DBPDUAL-01	2024	2	2.05 – 2.05	ppb	80	0	Byproduct of drinking water disinfection

Lead and Copper	Date	90th Percentile: 90% of your water utility levels were less than	Range of Sampled Results (low – high)	Unit	AL	Sites Over AL	Typical Source
COPPER, FREE	2020 - 2022	0.0747	0.0113 - 0.0825	ppm	1.3	0	Corrosion of household plumbing systems
LEAD	2020 - 2022	3.59	0 - 3.88	ppb	15	0	Corrosion of household plumbing systems; Erosion of Natural Deposits

Radionuclides	Collection Date	Highest Value	Range of Sampled Result(s)	Unit	MCL	MCLG	Typical Source
COMBINED RADIUM (.226 & .228)	10/6/2020	2.1	2.1	pCi/l	5	0	Erosion of natural deposits
GROSS ALPHA PARTICLE ACTIVITY	10/6/2020	3.4	3.4	pCi/l	5	0	Erosion of natural deposits
RADIUM-226	10/6/2020	2.1	2.1	pCi/l	5	0	

Microbiological	Result	MCL	MCLG	Typical Source
COLIFORM (TCR)	In the month of October, 1 sample(s) returned as positive	Treatment Technique Trigger	0	Naturally present in the environment

Violations and Health Effects Information

During the 2024 calendar year, we had the below noted violation(s) of drinking water regulations.

Compliance Period	Analyte	Type
1/1/2024 - 1/31/2024	CHLORINE	MONITORING, RTN/RPT MAJOR (GWR)

Additional Required Health Effects Language:

Certain minerals are radioactive and may emit a form of radiation known as alpha radiation. Some people who drink water containing alpha emitters in excess of the MCL over many years may have an increased risk of getting cancer.

Special Lead and Copper Notice:

Lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. MANSFIELD PWS is responsible for providing high quality drinking water and removing water system owned and controlled lead pipes, but cannot control the variety of materials used in plumbing components in your home. You share the responsibility for protecting yourself and your family from the lead in your home plumbing. You can take responsibility by identifying and removing lead materials in the portion of the service line you own, within your home plumbing, and taking steps to reduce your family's risk. Before drinking tap water, flush your pipes for several minutes by running your tap, taking a shower, doing laundry or a load of dishes. You can also use a filter certified by an American National Standards Institute accredited certifier to reduce lead in drinking water. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available at <http://www.epa.gov/safewater/lead>.

March 25, 2025

MANSFIELD PWS

Public Water System ID Number: MO5010493
2024 Annual Water Quality Report
(Consumer Confidence Report)

All contaminant sample results from past and present compliance monitoring are available online at the Missouri DNR Drinking Water Watch website at www.dnr.mo.gov/DWWV. To see the Lead and Copper results, enter your water system's name in the box titled Water System Name, then select Find Water Systems at the bottom of the page. On the next screen, click on the Water System Number. At the top of the next page, under the Help column, click on Other Chemical Results by Analyte. Scroll down to Lead and click the blue Analyte Code (1030). A Sample Collection Date range may need to be entered. The Lead and Copper locations will be displayed under the heading Sample Comments. Scroll to find your location and click on the Sample No. for results. If you assisted the water system in taking a Lead and Copper sample but cannot find your location on the list, please contact MANSFIELD PWS for your results.

A service line inventory was required to be prepared and can be requested from MANSFIELD PWS.

Date Identified	Facility	Category Code	Category Description
11/08/2024	WATER SYSTEM	DXKC	XC-Known X Connection
11/08/2024	WATER SYSTEM	FHCH	GEN Hatches

**Optional Monitoring (not required by EPA)
Optional Contaminants**

Monitoring is not required for optional contaminants.

Secondary Contaminants	Collection Date	Your Water System Highest Sampled Result	Range of Sampled Result(s) (low - high)	Unit	SMCL
ALKALINITY, CAC03 STABILITY	7/17/2024	265	265	MG/L	
CALCIUM	7/17/2024	53.2	53.2	MG/L	
HARDNESS, CARBONATE	7/17/2024	260	250	MG/L	
IRON	7/17/2024	0.0072	0.0072	MG/L	0.3
MAGNESIUM	7/17/2024	28.4	28.4	MG/L	
PH	7/17/2024	8.02	8.02	PH	8.5
POTASSIUM	7/17/2024	1.3	1.3	MG/L	
SODIUM	7/17/2024	1.73	1.73	MG/L	
SULFATE	7/17/2024	11	11	MG/L	250
TDS	7/17/2024	228	228	MG/L	500
ZINC	7/17/2024	0.00738	0.00738	MG/L	5

Secondary standards are non-enforceable guidelines for contaminants that may cause cosmetic effects (such as skin or tooth discoloration) or aesthetic effects (such as taste, odor or color) in drinking water. EPA recommends these standards but does not require water systems to comply.
